## NEW RECORD IS MADE BY THE 1302 ENGINE

After about three months of hard service on the different divisions from Chicago to Omaha, the Rock Island's hill climbing engine 1302, has proved entirely successful both in handling heavy trains and in speed. A passenger train of 13 cars is not uncommon and a new record for a fast train run from Rock Island to Chicago is held by this engine. On this run a maximum speed of 82 miles an hour with a train of six cars was reached.

A sister engine is now part of the exhibit at the pan-American exposition in Buffalo and four more engines of this type are under construction for the Rock Island.

The Best Way to the Pan-American is by the Michigan Central, for it is not only "The Niagara Falls Route," but its train service is superb. The Pan-American special, that went into effect June 9, is a swell train. It has the finest equipment the Pullman and Michigan Central shops can turn out. It leaves Chicago at 6 p. m., serves dinner in one of its famous dining cars, stops at Falls View next morning and reaches Buffalo at 7:45 a. m. You can't do better. Send for folder to L. D. Husner, general western passenger agent 119 Adams street, Chicago.
